Contents of Volume 1

Number 1, January 1974

Harry A. Whitaker. Editorial iii
A. R. Luria. Language and Brain 1
Macdonald Critchley. Aphasia in Polyglots and Bilinguals . . 15
Paul Fedio and John M. Van Buren. Memory Deficits During Electrical Stimulation of the Speech Cortex in Conscious Man 29
Hugh Buckingham and Andrew Kertesz. A Linguistic Analysis of Fluent Aphasia 43
Judith Trost and Gerald J. Canter. Apraxia of Speech in Patients with Broca's Aphasia: A Study of Phoneme Production Accuracy and Error Patterns 63
Victoria A. Fromkin, Stephen Krashen, Susan Curtiss, David Rigler and Marilyn Rigler. The Development of Language in Genie: A Case of Language Acquisition Beyond the "Critical Period" 81
Papers to Appear in Forthcoming Issues 109

Number 2, April 1974

Ola Arvid Selnes. The Corpus Callosum: Some Anatomical and Functional Considerations with Special Reference to Language 111
Laird S. Cermak, Nelson Butters and Judith Moreines. Some Analyses of the Verbal Encoding Deficit of Alcoholic Korsakoff Patients. 141
Hanna Krystyna Ulatowska and Sharon Mendel Richardson. A Longitudinal Study of an Adult with Aphasia: Considerations for Research and Therapy 151
E. B. Zurif, A. Caramazza, R. Myerson and J. Galvin. Semantic Feature Representations for Normal and Aphasic Language 167
Kenneth I. Robbins and Dale W. McAdam. Interhemispheric Alpha Asymmetry and Imagery Mode. 189
Marvin N. Goldstein. Auditory Agnosia for Speech ("Pure Word-Deafness"). A Historical Review with Current Implications 195
Duane M. Rumbaugh, Ernst von Glasersfeld, Harold Warner, Pier Pisani and Timothy V. Gill. Lana (chimpanzee) Learning Language: A Progress Report 205
Papers to Appear in Forthcoming Issues 213

NUMBER 3, JULY 1974

MARCEL KINSBOURNE AND DAVID B. ROSENFIELD. Agraphia Selective for Written Spelling. An Experimental Case Study . . 215

EGON WEIGL. Neuropsychological Experiments on Transcoding Between Spoken and Written Language Structures 227

RICHARD L. STRUB AND HOWARD GARDNER. The Repetition Deficit in Conduction Aphasia: Mnestic or Linguistic? . . . 241

ELAINE O. CHAIKA. A Linguist Looks at "Schizophrenic" Language 257

THEODOR VON STOCKERT. Aphasia Sine Aphasia 277

MARC L. SCHNITZER AND JAMES E. MARTIN. Sequential Constraint Impairment in Aphasia: A Case Study 283

BOOK REVIEWS

A. V. BARU AND T. A. KARASEVA. The Brain and Hearing: Hearing Disturbances Associated with Local Brain Lesions. *Reviewed by James Jerger* 293

JOHN H. GILBERT (Ed.). Speech and Cortical Functioning. *Reviewed by George D. Allen* 294

PAPERS TO APPEAR IN FORTHCOMING ISSUES 305

NUMBER 4, OCTOBER 1974

Dichotic Studies I

MICHAEL STUDDERT-KENNEDY. Editorial Note iii

JOHN K. CULLEN, JR., CARL L. THOMPSON, LARRY F. HUGHES, CHARLES I. BERLIN, AND DIANE S. SAMSON. The Effects of Varied Acoustic Parameters on Performance in Dichotic Speech Perception Tasks 307

JOHN J. GODFREY. Perceptual Difficulty and the Right Ear Advantage for Vowels 323

SHEILA E. BLUMSTEIN. The Use of Theoretical Implications of the Dichotic Technique for Investigating Distinctive Features . . 337

DAVID B. PISONI AND SANDRA D. MCNABB. Dichotic Interactions of Speech Sounds and Phonetic Feature Processing 351

James E. Cutting. Different Speech-Processing Mechanisms Can Be Reflected in the Results of Discrimination and Dichotic Listening Tasks 363

Grace H. Yeni-Komshian and Joel F. Gordon. The Effect of Memory Load on the Right Ear Advantage in Dichotic Listening 375

José Morais and C. J. Darwin. Ear Differences for Same–Different Reaction Times to Monaurally Presented Speech . . 383

Edgar B. Zurif. Auditory Lateralization: Prosodic and Syntactic Factors 391

Information for Contributors

Brain and Language publishes original research articles, case histories, critical reviews and scholarly notes; each contribution will be concerned with human language or communication (speech, hearing, reading, writing, or non-verbal modalities) related to any aspect of the brain or brain function. Each will have theoretical import, either formulating new hypotheses, or supporting or refuting new or previously established ones. The interdisciplinary focus includes the fields of neurology, linguistics, neurophysiology, psychology, neuroanatomy, psychiatry, neurosurgery and speech pathology. *Brain and Language* will accept material that has not been published elsewhere and that is not currently under review by other publications. Manuscripts of several different types are solicited: regular articles, single or multiple case history studies, critical reviews of books of interest to the journal's readership, and short (limited to under 10 pages typed) scholarly notes and comments discussing issues of topical interest.

Manuscripts should be submitted to either:

Editor: Harry A. Whitaker, Ph.D.
Department of Psychology
University of Rochester
Rochester, New York 14627

Associate Editor: Alan B. Rubens, M.D.
Aphasia Center, Hennepin County Hospital
5th and Portland South
Minneapolis, Minnesota 55415

Form of Manuscript. Authors should submit manuscripts in *triplicate* (one original and two copies), typewritten, double-spaced on one side of 8.5 × 11 in. white paper. The original and two copies of all artwork, tabular material, photographs, etc. must also be included. All pages should be numbered consecutively.

Page 1 should contain the article title, author(s) name(s) and affiliation(s), abbreviated form of the title for the running page heading (not to exceed 35 characters including letters and spaces) and the complete mailing address of the author to whom all correspondence should be sent. *Page 2* should contain a short *abstract* of approximately 100 words.

Papers must be written in English. Language data may be given in English when clearly identifiable, otherwise should be transcribed into the phonetic alphabet of the International Phonetic Association (IPA).

Figures should be numbered in order of appearance (with Arabic numerals) and should have short descriptive captions (typed double-spaced on a separate page). Line drawings must be originals in black India ink on white paper, on polyester drafting film, or comparable glossy black and white photographs. Lettering should be uniform, professionally done, and large enough to be fully legible after a 50–60% reduction in printing.

Tables should be numbered in order of appearance (with Arabic numerals); they should be typed double-spaced on a separate page. Each table should have a short descriptive title typed (double-spaced) above the table. Footnotes to tables (indicated by superscript lower case letters, ^{a,b}, etc.) should be typed (double-spaced) at the end of the table. Keep in mind the dimensions of the journal when planning the number of columns in a table.

Footnotes to the text should be kept to a minimum; when necessary, they should be indicated by superscript Arabic numerals, ^{1,2}, etc., cited consecutively throughout the article starting with the title. They should be typed double-spaced on a separate page.

References should be cited in the text by surname of the author and the publication date in parentheses, e.g., Goldstein (1948) or (Russell and Espir, 1961). If more than one paper was published by the same author in a given year, the correct style is Broca (1861a) or (Broca, 1861b).
